1. Problem Statement

A Digital Solution to address challenges faced by Senior Citizens.

This could relate to *health, social connection, daily tasks, safety, or general well-being*. This required us to actually talk to the users to- identify genuine pain points and propose features that directly respond to those needs. The app must demonstrate empathy for the user group and take into account usability, accessibility, and simplicity.

2. Identifying Users and Requirements

Primary User

Senior Citizens

(approx. Over 60 yrs)

Directly use the app to manage daily tasks, health, social connection, or safety.

Primary User Requirements:

- Login & Profile Management,
- Daily Task Management,
- Health Monitoring
- Content Access

Secondary User

Caregivers, family members, or healthcare providers

Users who support the seniors and may help set up, monitor, or assist with the app.

Secondary User Requirements:

- Login & Profile Management
- Communication,
- Emergency Response

Tertiary Users

NGOs, Government agencies, Admin, Insurers
To monitor and approve service / healthcare provider

Tertiary User Requirements:

- User Role Management
- Data Oversight,
- Content Approval,
- Data Analytics,
- CRUD operations

User Interviews

S.No.	Interviewer	Audio/Video Link 
1.	Somsubhra De	Video 1
2.	Advait Vats	Audio 1
3.	Devaanshi Chaudhary	Audio 2
4.	Jatin Yadav	Audio 3
5.	Karthik Ganesh	Audio 4
6.	Drishti	Audio 5
7.	Shourjya Bhattacharjee	Audio 6

3. User Stories (following SMART criteria)

As a Senior Citizen,

As a senior citizen,
I want an app with **large, readable fonts, easy-to-tap buttons, and access to gardening tips, folk songs, and spiritual content (Ramayana, Geeta, Mahabharata),**

So, I can use my phone comfortably and **enjoy my hobbies without help** or disturbing others.

Feature - Listen to Folk Songs and Audio Scriptures.

As a senior citizen,
I want an app that **reminds me of my medicine timings and routine health check-ups, and also keeps a simple record of my medical history in one place,**

So that I **never miss a dose** and can easily share my history with doctors.

Feature - Reminder for health check-up/ Medicine

As a senior citizen,
I want an **assistant that can read aloud printed or on-screen text, translate unfamiliar languages, and guide me step-by-step through common tasks like booking a cab**

,
So, that I **can complete daily tasks independently** without relying on others.

Feature - AI powered voice assistant guide

3. User Stories

As a senior citizen,
I want a **simple, secure messaging feature** to **connect** with my family, friends, and like-minded people,

So, that I can **stay socially connected and avoid feeling lonely**, without having to use complicated social media platforms.

Feature - Social Circles: Connect with Friends & Family

As a senior citizen,
I want **to play simple, brain games** like memory match, and word puzzles with clear instructions and large, **easy-to-use controls**,

So that I can keep my mind active and enjoy my free time independently.

Feature - Fun Puzzles and games to keep active

As a Family Member,

As a family member,
I want to **view their upcoming appointments, set medication and health check-up reminders**, and manage their medical records and prescriptions remotely,

So that I can **help them stay organized and healthy**, even when I am not physically present.

Feature - Family Connect - Remote Care and Support

Secondary User

3. User Stories

As an Admin, Ngo, Gov. Body,

Tertiary User

As an Government ,

I want access to **reliable, anonymized data on senior citizens' usage patterns, health trends, and service needs,**

So that we can **design informed, targeted policies** and provide effective interventions.

As a platform admin,

I want **to develop and manage a digital platform** that helps senior citizens stay socially connected, reduce dependence on others, and manage daily tasks with ease,

So that they **can live more independent and fulfilled lives.**

Tertiary users - Admin & Organization Access

Thank You!
