Problem Statement

A Digital Solution to address challenges faced by Senior Citizens.

This could relate to *health, social connection, daily tasks, safety, or general well-being*. This required us to actually talk to the users to- identify genuine pain points and propose features that directly respond to those needs. The app must demonstrate empathy for the user group and take into account usability, accessibility, and simplicity.

2. User Feedback

User Feedback Summary

As part of the initial phase, we conducted a feedback session with a target user where we presented the current wireframe design. The sessions lasted for about **30 minutes**.

During the discussion, she shared a useful suggestion regarding the login process. She mentioned that it might be difficult for elderly users to remember passwords, which could lead to frustration or difficulty accessing the app regularly.

We found this to be a relevant point, esp. considering our target user group who are less familiar with managing multiple passwords, and decided to replace the

The image shows two wireframe screens for a mobile application. The top screen is titled 'Register' and contains three input fields: 'Username', 'Password', and 'Confirm password'. The 'Password' field is circled in red. Below the fields is a 'Register' button. The bottom screen is titled 'Sign In' and contains two input fields: 'Username' and 'Password'. The 'Password' field is circled in red. Below the fields is a 'Sign In' button. At the bottom of the 'Sign In' screen, there is a link that says 'New user ? Register here'.

standard password-based login with an *One time password (OTP)* - based login system. This approach offers a simpler and more accessible experience as users would only need to enter a code sent to their registered phone number, removing the need to remember complex credentials.

The overall workflow was explained to her in detail. She appreciated the design, found the features relevant & useful and did not suggest any further changes.

Here're the **supporting proofs** of the discussion:

2. User Dashboard (for Senior Citizens)

3. Health and Reminders (for Senior Citizens)

4. AI Assistant (for Senior Citizens)

5. Entertainment Section- Mythology, folktales, songs, etc.

6. Secondary User Dashboard (Guardians/Children)

The image displays four wireframe screens for a Secondary User Dashboard, arranged in a 2x2 grid. Each screen features a top navigation bar with a hamburger menu icon, a search bar, and a 'Welcome username!' greeting with a user profile icon.

- Top Left Screen:** Titled 'Existing Reminders', it contains three input fields for 'Reminder text', 'Frequency', and 'Timing'. To the right of these fields are three 'Edit' buttons, each followed by a minus sign. A red arrow points from the 'Add new reminder' button at the bottom to the top right screen.
- Top Right Screen:** Titled 'Medical Records / Prescriptions', it contains three input fields for 'File', 'Dated', and 'Other info'. To the right of these fields are three minus signs. A red arrow points from the 'Add new record' button at the bottom to the top left screen.
- Bottom Left Screen:** This is a modal form for adding a new reminder. It has three input fields for 'Text', 'Frequency', and 'Timing', and two buttons at the bottom: 'Save' and 'Cancel'.
- Bottom Right Screen:** This is a modal form for adding a new medical record. It has three input fields for 'Attach file', 'Date', and 'Other info', and two buttons at the bottom: 'Save' and 'Cancel'.

7. Booking Appointments Section (for Guardians/Children)

The image shows a wireframe for the 'Booking Appointments Section'. On the left is a vertical sidebar menu with a dashed border, containing the following items: 'Appointments', 'Reminders', 'Records/Prescriptions', and 'Log out'. A red arrow points from the 'Appointments' item to the main content area.

The main content area is a large rounded rectangle with a top navigation bar identical to the ones in section 6. Below the navigation bar, the section is titled 'Upcoming appointments'. It contains three input fields: 'Date & Time', 'Venue', and 'Other info'. Below these fields are three rows of dashed lines for additional information.

Thank You!
